WEB DEVELOPER PROFILE

I am a front end developer with a background of 12 years in the hospitality industry who enjoys the challenge of translating the ideas and design of a project to a working and accessible site. In my previous career, I was known for being reliable, compassionate, and a problem solver whether leading the team or following directions. I was also often a mentor to many colleagues and junior employees as I worked in lead training roles.

SUMMARY OF SKILLS

JavaScript | React JS |Vue JS | RESTful APIs | Firebase | CSS3 / SASS / SCSS | HTML5 | Git | GitHub |

Project scope and Management | Paired Programming & Team-based Development | Web Accessibility | Responsive Design |

Time Management | Problem Solving | Conflict Resolution | Leadership | Self-sufficiency | Multi-tasking | Time Management |

RECENT PROJECTS

Fire It (Skills: React, Firebase Firestore, Firebase Authentication, Javascript, SCSS) - GitHub - Live Link - About Video
- A replica of the desktop touch screen point of sale system I worked with for four years in my last jobs in hospitality. The project consists of two major "view" components and various CRUD applications to that data. This includes creating employees, menu items, and laying out a floor map of tables as Manager as well as being able to "order, bill and take payment" for the items as a Server on those tables. This is an ongoing project as I continue to challenge myself to add more of the functionality I experienced in my work history.

Tremors (Skills: React, REST API, Firebase) [Group] - GitHub - Live Link
- The Juno Bootcamp final project combines React, Firebase and API usage to call and store data involving earthquakes. We were able to utilize a stretch goal using a second Api using promise chaining allowing the user to also search by destination. We used three React Libraries to display the map as well as for creative styling.

Bar Menu Helper (Skills: React, REST API, SCSS) [Solo] - GitHub - Live Link
- Creating a multi component React application based on Axios for API calls, utilizing the useState hook for Axios as well as practicing the use of passing props through components.

Under the Sea (*Skills:* Javascript, *Responsive Design, CSS3, HTML5*) [Solo] - GitHub - Live Link - Original PNG
- Design to website translation with implementation of media queries for functionality on multiple screen sizes. During this project I used a mobile first design strategy as no mobile design was provided. Stretch goals consisted of Javascript to create a functioning hamburger menu and image carousel on mobile screens.

EDUCATION & TRAINING

Juno College of Technology | Web Development Immersive Bootcamp and Intro to Web Development Course | Toronto 2022

WORK EXPERIENCE

Matrix Integrated Solutions, *Markham, Canada*   2023 – Current
Point of Sale Support
- Built databases, trained and provided technical support for clients using Epson, Berg, Squirrel or Universal POS Software
- Installed hardware & terminals, setting up the networks required for their interfaces and host PCs
- Coordinated with and provided test data between software developers to improve or update software interfaces

The Well Hamilton Inc, *Toronto & Hamilton, Canada*   2021 – 2022
Assistant General Manager
- Structured Berg and Squirrel point of sale systems functionality and UX for simple and efficient use by staff
- Updated company cash out and inventory excel sheets, reducing 100-300$ / week from staff errors between technologies
- Created, upheld and taught restaurant policies for categories including general house, harassment, guest interaction, emergency, fire, medical and covid-19

817 Sports Bar & Grill (Magnum TO), *Toronto, Canada*   2018 - 2021
Assistant General Manager
- Interviewed, onboarded, and trained over 70 Front of House staff
- Maintained budgets with scheduling strategies and efficient ordering of alcohol from the LCBO and Beer Store.
- Learned to operate, multitask and create solutions to problems arising from the operation of a brand-new venue
- Lead staff teams of ~10 in the execution of 200 guest(s) events in tandem with the Chef
- Kept consistency between in house point of sale system, WordPress website, QR code menu & delivery apps
